Reviews & Grades Report: Michele Aylward - Winter 2018				
DESIGN 113 Design Applications	Grade: A	Attendance: 48 / 48 hours (100%)		
Mid-Term Review	Assignments			
Michele was quick to grasp the basic topics and requirements of design drills and application. She also showed an enormous interest and curiosity in the relevance of design to fine arts. Review Date: 2018-04-23		Three projects exploring the dynamics of line work, form and tone.		
End Of Term Review		Assignments		
Michele finished the course with inventive ideas in composition and new approaches to image development and problem-solving techniques.		Design projects explored space, harmony and layout.

DRAWING 111 Building Your Foundation	RAWING 111 Building Your Foundation Grade: A-		Attendance: 48 / 48 hours (100%)		
Mid-Term Review		Assignments			
Doing well so far. We've made it through the difficult tedious exercises and are into the challenging more complex subject-matter. Keep working hard and you will continue to improve.		Up to Date			
Review Date: 2018-01-21 End Of Term Review		Assignments			
Good work Michele, you showed steady improvement throughout the term. Here are some reminders and rules to help keep you on the right path. You'll very rarely get it right the first time so do a lot of quick preliminary thumbnail sketches to work out the basic structure and compositional ideas, then choose the best to work on in your finished drawing. Start off with a very light drawing and build the tones slowly and evenly throughout your drawing, working from light to dark, large to small, background to foreground. This will help produce a better drawing in a shorter time. 				Never start off drawing with dark tones, the dark tones are the last tones you apply.	
Never outline the objects in your drawing as those objects will look rather flat.					
Try and find the fastest way to create the trying to represent, a little experimentation or another sheet of paper will the long run.					
All objects sitting on planes parallel to the horizon will have their vanishing points somewhere on the horizon line.					
The horizon is always your eyelevel. In our real human made world there are no vanishing points, they are more like vanishing circles about the size of a loonie.					
Parallel lines going away from you will appear to converge in the distance.					
An object that is 4 feet away from you whalf its size (2 feet). Therefore the vertifoot cube will have greater variation in the vertical lines on a 1 inch cube even represented in the same drawing as besame size.	cal lines on a 4 their length than when they are				
Cut yourself a little slack, you're going and that's OK.					
Have fun when you draw and your draw to look at. Keep trying and you will get					
look forward to teaching you again.
