Rose created a beautifully written, sophisticated take on the rational logics that design architectures in story narratives, cathedrals, digital landscapes and other creative genres share--imitation of Nature. Her discussion revolved around the hubris inherent in the notion we can do better than Her, and the potential consequences of Transhumanist philosophy. Brava! Nicely done Rose, you are a good student and a pleasure to have in class. I have no doubt that you will continue to put in the required effort and so you will continue to improve. Remember the basics of painting and you will continue to do well: work out your composition before you get to the canvas, take the time to mix the colours you want, use the right brush for the job, work background to foreground, be as sloppy as possible for as long as possible, mix your paint to the appropriate consistency for the technique you are employing, when you are trying for subtle changes in background colours the change should be just noticeable, control the contrasts (colour, light dark, tonality, temperature, simultaneous, shape, line, brush stroke direction, etc.) and make them work for you, if the painting looks better without "it" don't put "it" in, the last thing you will paint are the final highlights and shadows, you're going to make mistakes so lighten up and allow yourself to have some fun. I look forward to teaching you again. Review Date: 2021-12-23		Attendance 12/12 Participation 40/40 Paintings 47/60 total 87/100
